

Gspro Control Box Installation Guide

This program is designed as a standalone HTML app and will work with either an Android or iOS Tablet. Chrome is the preferred browser, but it will also work with Safari.

You can contact me at the email below if you find any bugs or wish something new to be added.

Email: controlbox365@outlook.com

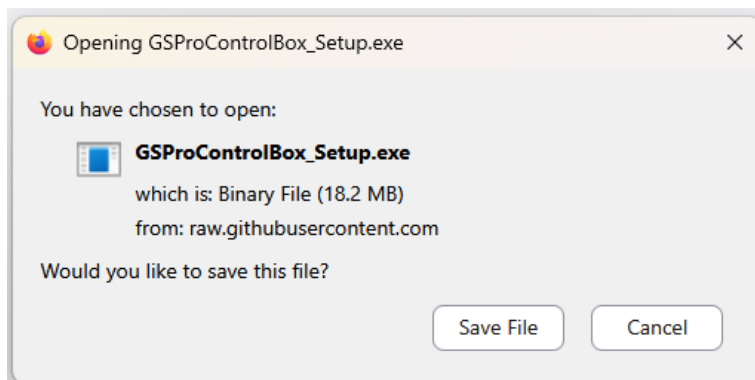

1 Instal GsPro Control Box 365

Click the link below, this will download GsPro Control Box 365 installation package to your PC.

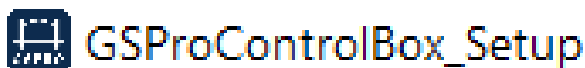

<https://tinyurl.com/Controlbox365>

2 Installation Process

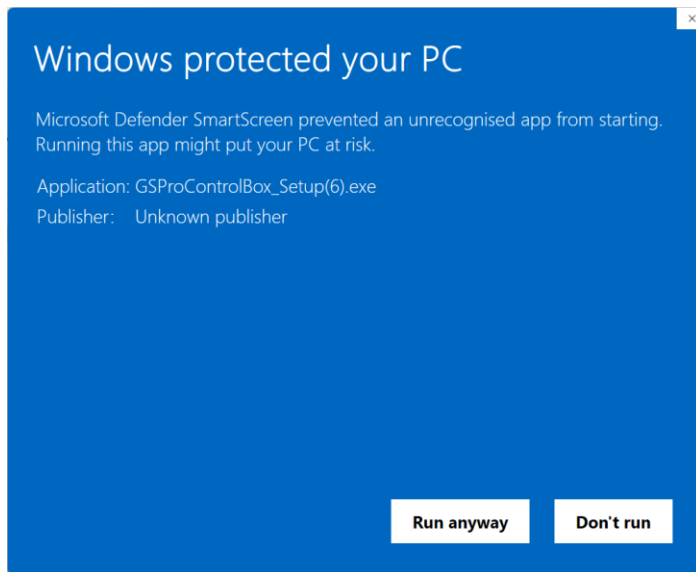

Click the 'Save File' button this will save the installation link in your 'Downloads Folder'.

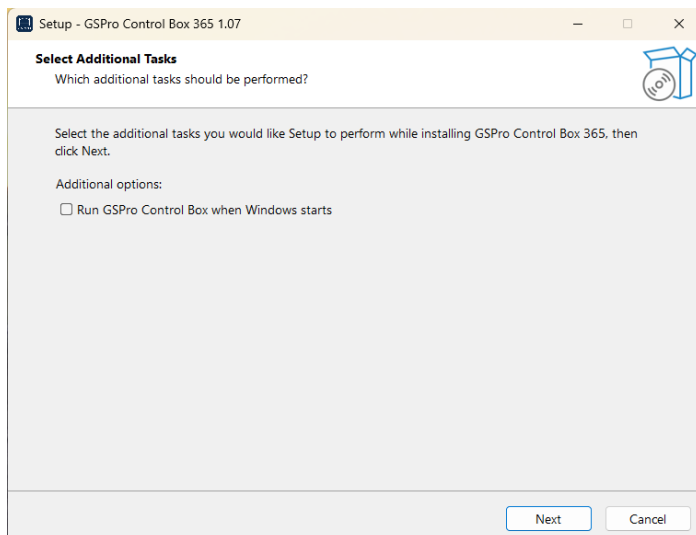

This will download the installation package to your 'Downloads Folder'. Click the GSProControlBox_Setup and this will start the installation process.

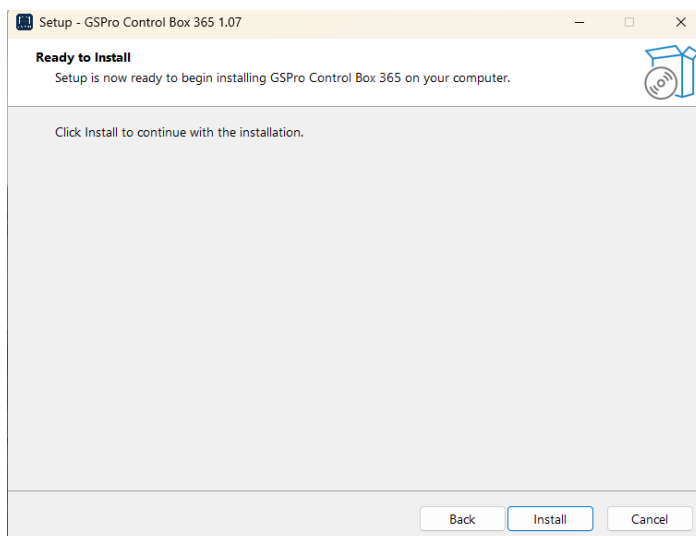

You may receive a Windows popup, if so hit 'Run anyway' this will install the Gspro Bridge. This bridge sits between your tablet and the PC running Gspro, allowing you to send Gspro shortcut keystrokes from the tablet to Gspro.

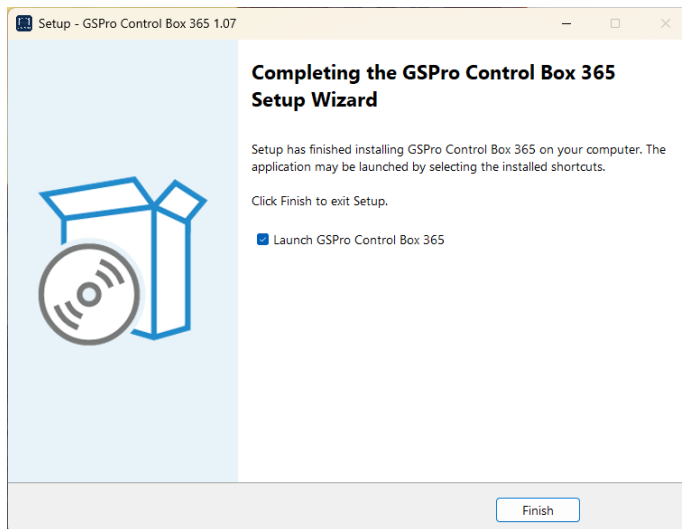

Hit the next button to start the install process.

Hit the install button and the install process will begin.

When completed you can launch Gspro Control Box 365 by clicking the option and by hitting finish button.

As part of the installation process a Control Box shortcut will be added to your desktop. In the future when you wish to run Gspro Control Box 365 just hit the desktop shortcut.

This will launch a QR code on your PC, scan this QR code with your tablet.

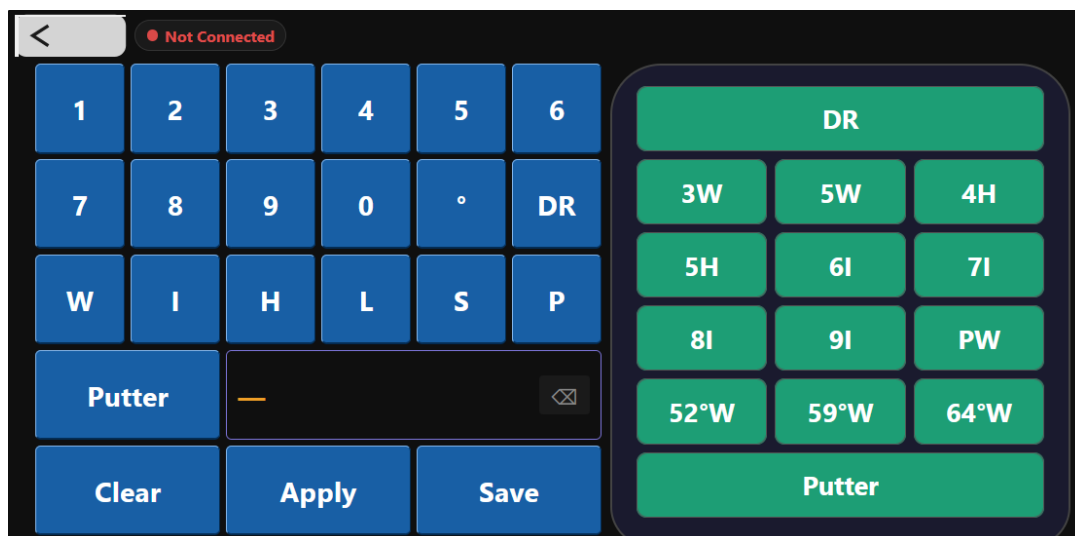

3 Running Control Box 365

Once the QR code is scanned this will open Control Box 365 at the 'Welcome Page' in your browser.

3.1 Bag Mapping

The first sub page is the 'Bag Mapping Page' here you can map your clubs (I have already mapped my clubs as shown below). Once you have completed your bag hit save.

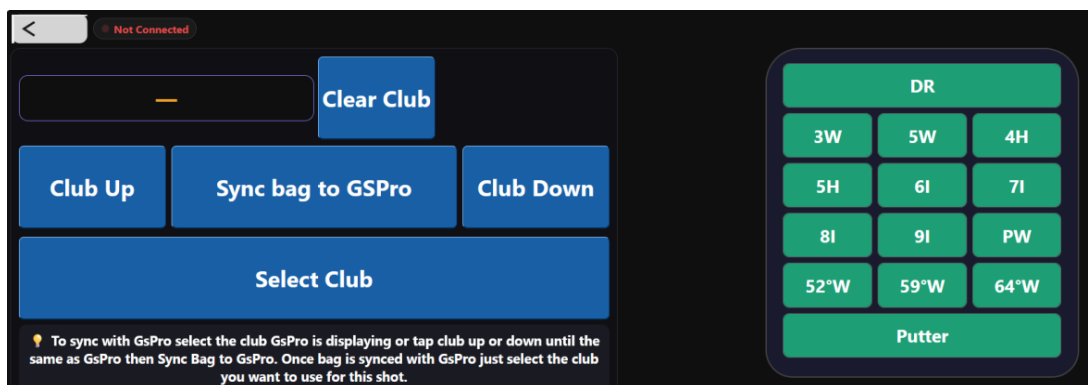

3.2 Game Play

This is the main page while playing Gspro, with all the mainly used buttons.

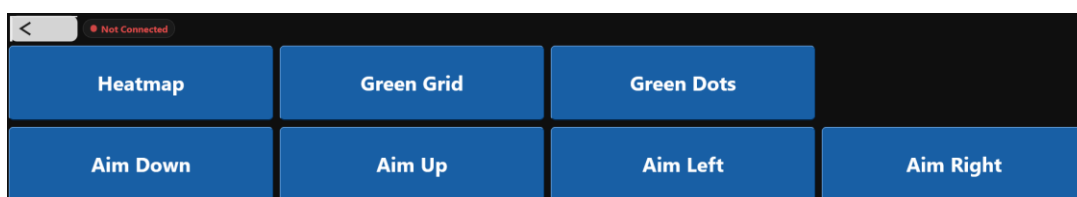

3.21 Club Selection

This is where the bag mapping is displayed, you can sync the club with Gspro either by tapping the club displayed in Gspro or by using the up or down buttons and the sync bag to Gspro. Once you do that next time you want to change clubs use tap the club you want to play.

3.3 Putter

The 'Putter Page' displays the main buttons used in putting mode.

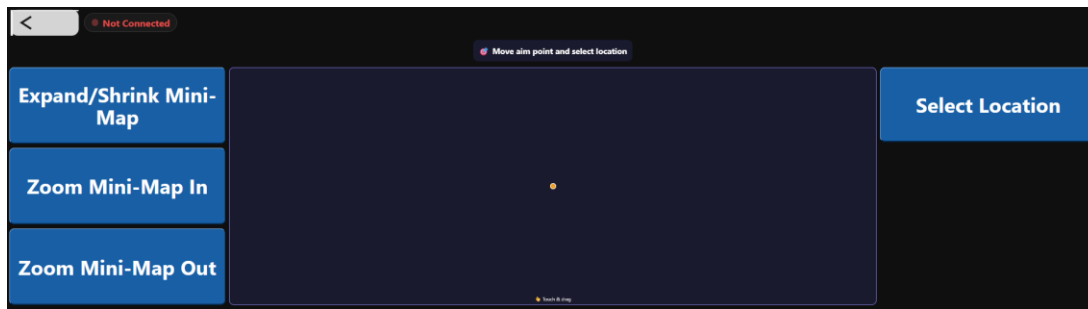

3.4 Camera

The 'Camera Page' displays the main buttons used to change the camera actions.

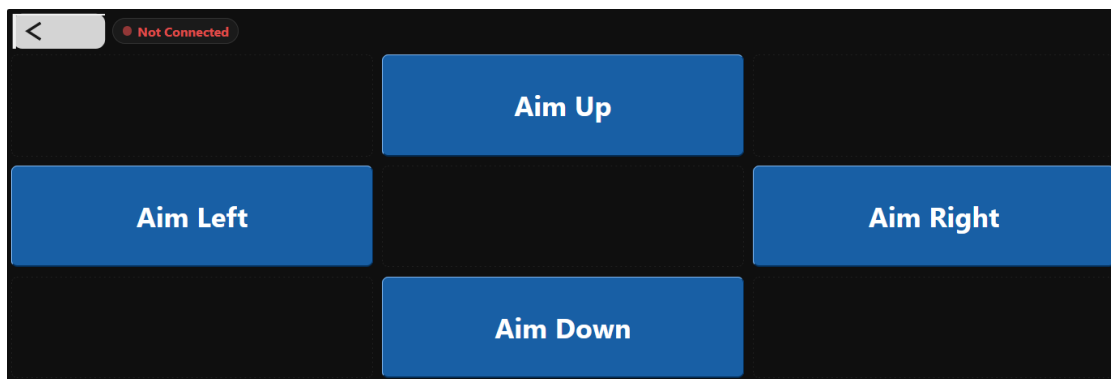

3.5 Mini Map

The 'Mini Map Page' here you can used the touch pad to move the mouse around the Gspro screen and once in the correct place tap the select location button.

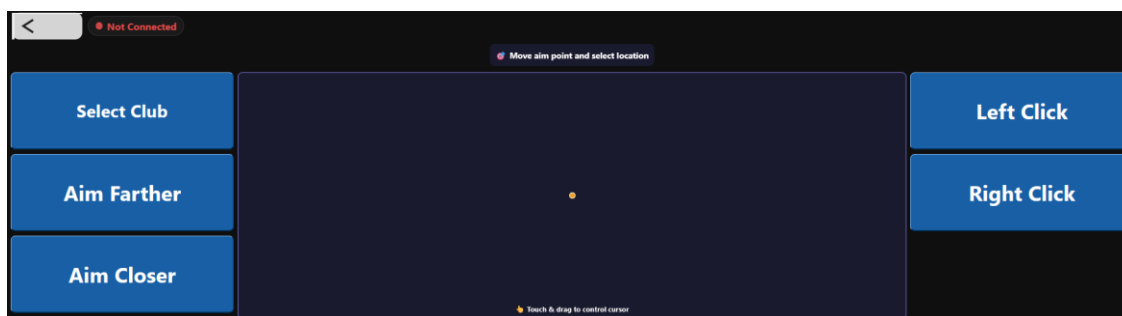

3.6 Ranger Finder

The 'Range Finder Page' when you select Range Finder here you can adjust where the Range Finder target aims.

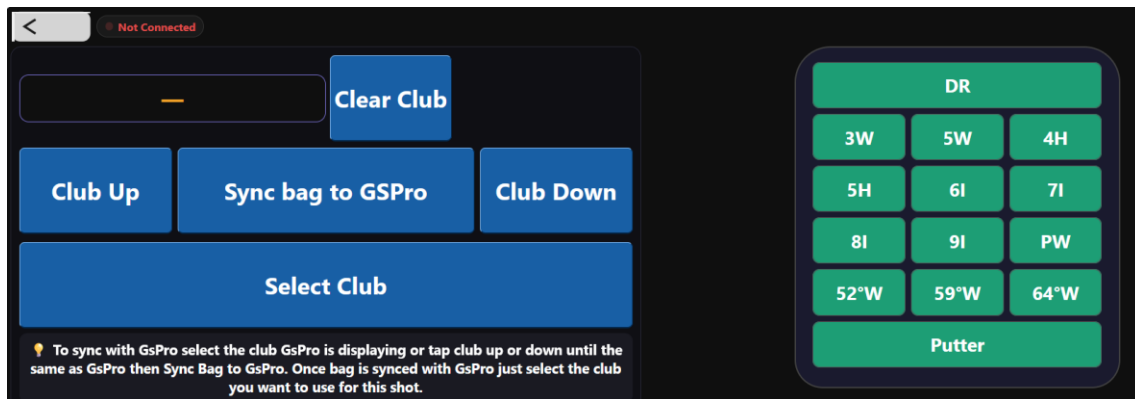

4 Practice

The 'Practice Page' this the same principle as the Mini Map page where you can used the touch pad to move the mouse around the Gspro screen and once in the correct place tap the left or right button.

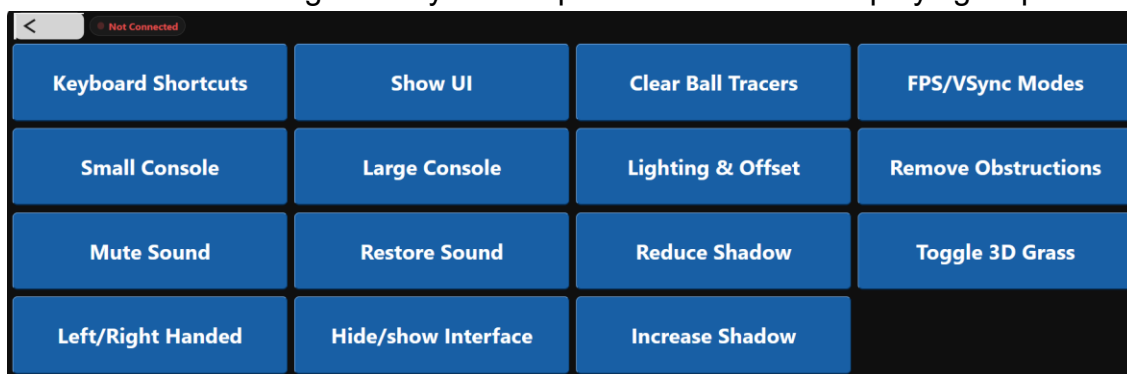

4.1 Club Selection

This the same as above and once the bag is synced with Gspro, you just tap the club you want to play.

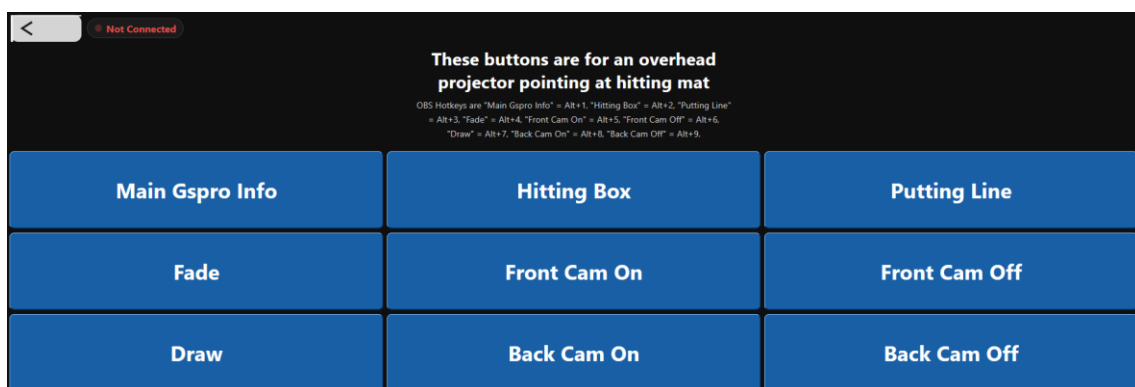

5 Environment

The 'Environment Page' here you set up the environment for playing Gspro.

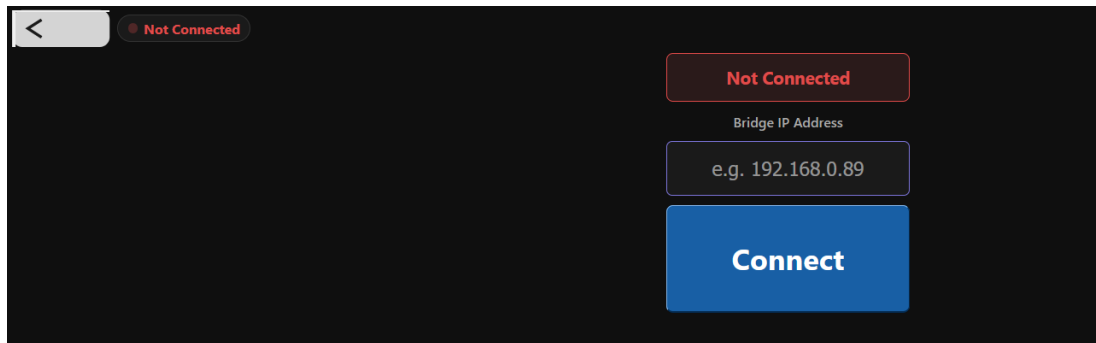

6 OBS

The 'OBS Page' this is used if you have an overhead projector pointing at you hitting mat. Also, if you have two Cameras for recording you swing front on and from the back. All these buttons need to be mapped to the relevant shortcut keys in OBS, Alt+1 to Alt+9.

7 Connect to PC

The 'Connect to PC Page' when you scan the QR code your IP address is automatically put in the relevant window (if not this can be put in manually), so if your connection to the Gspro bridge is lost you can reconnect.

8 Quit

The 'Quit Page' this closes Gspro Control Box 365 and the bridge window.
